PROFESSIONAL SUMMARY

Python-focused Software Engineer with hands-on experience across the full software development lifecycle — designing, coding, testing, and debugging components for web applications built with Django, REST APIs, and MySQL. Comfortable working in agile, collaborative environments, contributing to problem-solving discussions, and delivering clean, maintainable, and scalable solutions tailored to business requirements.

SKILLS

Programming Languages: Python, JavaScript, HTML, CSS

Frameworks & Data: Django, REST APIs, MySQL

Practices & Concepts: Agile/Scrum methodologies, Software Development Lifecycle (SDLC), Object-Oriented Programming (OOP), Data Structures, Software Testing & Debugging, Basic System Design

Tools: Git, GitHub, Version Control

AI Coding Tools: GitHub Copilot, Claude AI, ChatGPT

EXPERIENCE

Software Analyst

Aug 2025 – Present

Ideabytes, Hyderabad

- Served as primary QA for TaskRay (Salesforce), debugging backend issues and analysing workflows to improve system stability.
- Developed and maintained UI automation test scripts, improving test coverage and reducing manual testing effort across agile release cycles.
- Collaborated closely with developers on API behaviour analysis, problem-solving discussions, and backend workflow improvements to support defect resolution.
- Partnered with business analysts on requirements gathering and accurate defect reporting, contributing to documentation and knowledge sharing within the team.

SDE Intern

Feb 2025 – Mar 2025

Bluestock Fintech

- Built responsive UI components in HTML, CSS, and JavaScript; integrated them with backend services for seamless data flow.
- Iterated rapidly on UI modules based on team feedback in a fast-paced, collaborative development environment, improving component quality across cycles.
- Optimised frontend interaction logic, measurably improving application responsiveness.
- Translated business requirements into working features using Git-based version control workflows.

PROJECTS

SpendWise (Live)

- Architected and shipped a production-grade, full-stack personal finance application using Python (Django) for backend logic, covering frontend, backend, and database layers.
- Designed a RESTful API layer in Python/Django handling transactions, budgets, and financial data with clean, modular, maintainable code.
- Optimised database queries and backend logic, improving page-load performance and overall user experience.
- Independently carried the project through the full development lifecycle — from design and coding to testing, debugging, and deployment.
- Deployed live, demonstrating the ability to take a project from concept to production independently.

EDUCATION

B.Tech in Mechanical Engineering

2021 – 2025

Geethanjali College of Engineering and Technology | CGPA: 7.58 | 15 years of full-time education
